Forecast for Tuesday 12 Dec 2023

Weather: Showers merging into bands of rain through the morning with heavy downpours, the chance of hail and thunder and some gusty winds too. Brief brighter interludes are possible but generally a cloudy day with further showers, heavy at times through the afternoon and evening. A reducing chance of heavy or thundery showers after dark.

Chance of cloud-free hill tops above 600m: 30%

Low cloud and visibility: Extensive cloud above 700m throughout the day with lengthy periods of cloud down to 400-500m during showers. Often poor in showers or rain with very poor visibility in the cloud and during any hail showers. Temporarily good at lower levels during any drier interludes.

Forecast for Wednesday 13 Dec 2023

Weather: One or two showers continuing into the early hours of Wednesday. These fading soon after daybreak to leave a generally dry albeit cloudy morning. Gradually brightening up by lunchtime with sunny spells becoming more prevalent by the afternoon. Staying dry through the evening.

Maximum wind: Northerly 25 mph gusting 25 mph easing to 10-15 mph by the end of the afternoon.

Chance of cloud-free hill tops 600m: 40% becoming 80%.

Low cloud and visibility: Periods of cloud above 600-700m at first, gradually lifting to 800-900m with most summits clearing of cloud during the afternoon. Generally very good visibility with excellent air clarity, but locally very poor in cloud.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 9 Celsius.
At 600m: Plus 3 Celsius.
Freezing level: 900 metres, lowering to 700 metres during the evening.
